

# Lab 1 – HTML Recipe Page

REQUIREMENTS: *Create a web page for your favourite recipe.*

*NB: You will notice that I have purposely avoided naming any tags in the Requirements, as part of the challenge is to select the most semantically appropriate tags judging from the description of requirements.*

1. Create an html page called **lab1.html**.
2. Your page must include:
  - a. a primary title with the name of your web page (e.g. 'Sally's Sweets')
  - b. a secondary heading with the category of recipe (e.g. 'Cakes & Pies')
  - c. a list of ingredients
  - d. a list of steps to create this recipe
  - e. a photo of the finished product
  - f. descriptive paragraphs where appropriate
  - g. some italicized words where emphasis is appropriate
  - h. some bold words where strong emphasis is appropriate
  - i. a comment in the code stating where you found the recipe
3. Some descriptive text should appear on the page tab in the browser.
4. A link to the main Humber website with the text, "For more information, go to the Humber College website"

EXTRA CHALLENGE: Add some styling (background colour, text colour, fonts, borders et cetera) in a linked style sheet.
